

iCitizen - Mi van vele?

The Erasmus plus project “iCitizen”, took place amidst the beautiful nature of Liptòd, a small rural town bordering one of Hungary's oldest universities, Pècs. For many of them, this was their first experience, they had the opportunity to practise their English and learn about the culture of a wonderful country like Hungary. Each of them was able to express their own opinion and being, thanks to the care taken in listening and the creation of a safe environment. These days were for many of us, intense and full of moments that will remain in our hearts. The power of this place in its simplicity allowed us to live in contact with each other and expand our knowledge in the digital sphere. In fact, in the community room next to the country's famous and unique church, various workshops were held covering the topics of the tools of the future in the professional sphere, their use and how we can align it with our interests. We went from activities such as how to recognise a scam and what ways can make us safe online, to activities dedicated to the topic of social detox. Participants for this project came from 4 countries: Hungary (the greatest host ever), Italy, Spain and Croatia.

We will definitely remember the moments spent together between the intercultural evenings, the visit to the Liptod art exhibition, the delicious traditional food that allowed us to connect with this land.

These seven days touched our existences like a ray of sunshine caressing your face, the skills we learnt from the use of creativity at work, to managing situations of under pressure, digital literacy, ensured that we returned home with an extra baggage, that of knowledge.

The unanimous opinion of the participants is based on the desire to keep these memories as a precious box, using the advice and build something for our future, the hope that dreams can be realised through study, commitment and attention to ourselves.

With love,

Lucia, Chiara, Saira, Tibi and Adrian.
